

VALLO: The Founding Phase Abstract

A Premier Asset-Backed Digital Ecosystem

Executive Overview

VALLO represents the convergence of institutional-grade security and next-generation liquidity. Unlike speculative digital assets, VALLO is an ecosystem architected on the principles of **tangible value, legal transparency, and fiscal responsibility**. By anchoring a high-velocity digital currency to a diversified portfolio of premier assets including real estate and gold reserves, VALLO provides a stable, scalable bridge for the 2026 global economy.

Strategic Pillars

I. Asset-Backed Stability

Every unit within the VALLO ecosystem is supported by a **Foundation Warranty**. This ensures that the digital currency maintains a valuation floor linked to physical, audited assets, minimizing volatility while maximizing long-term capital preservation.

II. Institutional Governance

We operate with a "Compliance-First" methodology. Our framework is designed to integrate seamlessly with existing banking infrastructures, providing professional advisors and institutional partners with a transparent, audited, and legally robust environment.

III. Strategic Distribution

The 2026 launch phase is governed by a **Founding Allocation** model. This ensures a curated entry for early participants, prioritizing partners who bring both capital and strategic value to the ecosystem's growth.

Participation Categories

- **Founding Allocation Partners:** Accessing preferential entry tiers and securing a position within the initial liquidity pool.
- **Professional Advisory:** Engaging with VALLO on a structural level, spanning legal, tax, and compliance frameworks.
- **Technical & Strategic Partners:** Developing the infrastructure for AI-integrated finance and blockchain settlement.
- **Ecosystem Talent:** Operational experts driving the global expansion of the Vallo Group.

2026 Roadmap: The Path to Launch

The VALLO Founding Phase is currently open for qualified inquiries. Following the close of the allocation period, the ecosystem will move into its primary deployment phase, activating the asset-backed treasury and initial exchange listings.

Our first tokenization stage are 5 properties located in Spain, Portugal and Iceland that have been valued €17.290.000 by Century 21, a leading international Real Estate Group.

The Financial Engine: Tokenized Assets

Real Estate Tokenization Market

Projected \$16 TRILLION by 2030

(Source: Broadridge)

- Fractional Ownership:** Invest in luxury property from €100.
- On-Chain Liquidity:** 24/7 Trading on blockchain exchanges.
- Automated Yields:** Smart contracts distribute rental income.

The Market Driver: Digital Nomads

Global Digital Nomad Growth

50M+ Travelers by 2026

2023: 35M

- Explosive Growth:** 40% increase in 3 years.
- Long-Stay Culture:** Average stay: 9 months.
- Infrastructure Priority & dedicated workspaces:** High-speed fiber & dedicated workspaces.

100+ Mbps Symmetrical Fiber

"Vallo tokenization transforms real estate from a static asset into a dynamic, service-oriented ecosystem for the \$787B digital nomad economy."

VALLO

"Our mission is to redefine the nature of currency by restoring the link between digital exchange and physical reality." — Thor Magnusson Islandus Vallo Group
